

Introduction to **RISK FLEET MANAGEMENT**

We Now Offer **Advanced Risk Management**

Mont Blanc Technologies is thrilled to introduce our new 4 Channel AI Cam, a cutting-edge innovation in dashcam technology. Our goal is to equip our clients with top-tier tools for effective fleet management, risk reduction, and the promotion of safe driving practices. The 4 Channel AI Cam transcends basic recording functionality with its integrated processor, elevating it to a comprehensive driver behavior monitoring system. Beyond monitoring the road, the 4 Channel AI Cam also promotes driver safety by detecting inattentiveness, mobile phone use, unfastened seatbelts, and even driver fatigue or smoking. This multifaceted approach fosters a safer driving environment.
