MBFS Growth Portfolio

Factsheet at: 30 April 2024
Benchmark: CPI + 6% over rolling 7-year periods
Investment horizon: Seven years
Portfolio managed by: Equilibrium Investment Management (Pty) Ltd

Investment mandate

The portfolio aims to outperform the benchmark, net of investment management fees, over any rolling 7-year periods.

Investment strategy

The portfolio is a growth portfolio and is diversified across the major asset classes utilising a multi-manager approach whereby fund managers are combined based on their skill and expertise. The available asset classes include: bonds, equity securities, non-equity securities, money market instruments, preference shares, property securities and assets in liquid form. The portfolio may invest in foreign assets as permitted by legislation and complies with Regulation 28 of the Pension Funds Act, 1956. The offshore exposure of the overall portfolio will be based on that of the underlying funds.

Under no circumstances shall Equilibrium, Momentum Metropolitan Holdings Limited, its affiliates, directors, officers, employees, representatives or agents (the "Momentum Parties") have any liability to any persons or entities receiving the information made available in this factsheet for any claim, damages, loss or expense, whether caused by the Momentum Parties' negligence or otherwise, including, without limitation, any direct, indirect, special, incidental, punitive or consequential cost, loss or damages, whether in contract or in delict, arising out of or in connection with information made available in this factsheet, whether relating to any actions, transactions, omissions resulting from this information, or relating to any legal proceedings brought against you as a result of this information, and you agree to indemnify the Momentum Parties accordingly.
The launch date is the start date of the portfolio or the date of Equilibrium's appointment to administer and manage the portfolio. Returns before this date may be based on the portfolio's pre-existing returns history, if any, or on a combination of calculation methodologies. Return calculation methodologies may include: simulated returns before the launch date of the portfolio based on the portfolio's strategic asset allocation at the launch date, which would not reflect Equilibrium's historic asset allocation views, or any changes, which would have been made to the portfolio holdings over time, money-weighted returns calculated on the total value of the portfolio with the size and timing of cash flows taken into account, or returns based on an investment in a tracker or index portfolio, which are time-weighted returns and the effect of cash flows are not taken into account. For simulated return calculations, the underlying funds' retail share classes with the longest return histories have been used. For funds with limited return histories, the applicable index returns have been used. For the tracker or index portfolios, returns are after the deduction of the portfolio management fee and either before, or after, the deduction of any platform administration fees (depending on the platform on which the tracker or index portfolio is invested) and before financial adviser fees. Returns for periods exceeding one year are annualised. The return for the Consumer Price Index (CPI) is at the end of the previous month. Total investment charges (TIC) are the sum of a fund's total expense ratio (TER) and the transaction costs (TC). The portfolio's TIC is an estimated total for the portfolio based on the weighted average of the underlying funds in which the portfolio invests using the latest available data. The portfolio's asset allocation is based on the weighted average of the underlying funds in which the portfolio invests using the latest available data. The portfolio's asset allocation may differ from time to time due to market movements, changes to the portfolio and the underlying fund data and limitations. The underlying funds may contain exposure to assets that are invested globally, which may present additional risks. Individual investor returns may differ as a result of platform and adviser fees, the actual investment date, cash flows and other transactions. All fees include VAT.
Equilibrium does not provide a guarantee on the value of the portfolio, nor does it guarantee the returns of the underlying funds in the portfolio. The investor acknowledges the inherent risk associated with the portfolio (currency, investment, market and credit risks) and that capital is not guaranteed. A switch transaction between underlying funds within the portfolio may incur capital gains tax (CGT) for the investor, should the product through which the investor buys the portfolio not be CGT exempt.
